Synopsis of the Facility

The Facility is primarily a grant-making fund aimed at a wider and more effective participation of South African policy research institutions on issues of regional and domestic policy-making and implementation within the field of Conflict and Governance. The Programme intends to promote co-operation and dialogue between policy research institutions, active involvement of policy-makers and leaders of civil society, and a wide dissemination of findings. The programme will run until August 2007 with a six-month closure until February 2008.

The Facility will, through the provision of Grants, focus on analytical research and studies on conflict and governance issues. It is designed ultimately to contribute towards improving national policy decision-making and implementation on foreign and domestic policy issues that avert and/or mitigate conflicts, thereby enhancing good governance and deepening democracy in South Africa, the region and possibly on the continent.

Scope of Work of the Facility

The following core result areas or outcomes are to be achieved: ● Improved policy analysis as a basis for better informed policymaking and implementation ● Capacity of research institutions strengthened: Incentives for joint research between established and emerging institutions, thereby promoting transfer of knowledge and skills ● Policy debates and quality of discussions and dialogue enriched through policy feedback mechanisms, workshops and publications by research and policy partners on policy issues, research findings and recommendations.
